EXECUTIVE SUMMARY

Subsequent to the 2023 Selection of Pre-Apprentices which took place from 1st to 8th August, 2022, the Recruitment Committee met again at Mountain View Lodge in Dedza from 4th to 8th October, 2022 to conduct a second selection of the pre-apprentices. The second selection was done by filling 345 spaces which were not filled during the initial selection, and then selecting 30% (based on non-reporting rates of pre-apprentices in previous years) more applicants for each trade from a pool of candidates that were unsuccessful during the initial selection for 2023.

The objective of the second selection was to increase intake and increase potential beneficiaries of the Inclusive Bursary Scheme under the Skills for Vibrant Economy Project being implemented by the Malawi Government with funding from the World Bank.

It should be noted that during the initial recruitment, some colleges were not allocated pre-apprentices in some trades because the colleges had shortfalls on regulatory and compliance requirements. These institutions were not eligible to offer training in those specific trades at that material time. During the second selection meeting, it was reported that such colleges were working towards addressing the shortfalls. The meeting agreed to allocate pre-apprentices to such colleges on condition that successful candidates will only report to the colleges when all shortfalls have been cleared.

Out of the 1,836 applicants that were not successful during the initial recruitment, the committee selected 903 (388 females and 515 males). It must be pointed out that of the 903 selected during the second selection, there were no pre-apprentices selected for the following trades: Bricklaying, Carpentry and Joinery, Solar Photovoltaic and Woodwork Machining. This was because there were no applicants left in the database used who had applied for the trades. This was despite colleges having spaces to accommodate more pre-apprentices for the trades.

In a related development, there were few applicants for Edible Horticulture, resulting in some colleges not allocated students for the trade. Some colleges were not allocated students on second selection in some trades because the selection committee was of the consensus that such Colleges did not have capacity to handle extra numbers.

The selected pre-apprentices are expected to report for training on 6th February, 2023 and will have a grace reporting period of up to 13th February, 2023.

1.0 THE DETAILED 2023 PRE-APPRENTICESHIP SECOND SELECTION PROCESS AND RESULTS

1.1 THE RECRUITMENT PROCESS

A recruitment committee held a meeting from 5th to 8th October, 2022 at Dedza Mountain View Lodge to conduct a second selection of pre-apprentices by recruiting 30% additional apprentices into every trade offered by colleges that had pre-apprentices selected to in the first selection cycle. This 30% was reached at after a consideration of the percentage of applicants that do not report for training to National Technical Colleges after being offered opportunities for training. The candidates for second selection were drawn from the database of those that applied for the 2023 recruitment in July 2022 but were unsuccessful in the initial selection. Thus, all candidates that were not selected in the initial recruitment exercise were eligible for the second selection.

Statistically, out of the 1,836 applicants who were not successful in the initial recruitment, the committee selected 903 (388 females and 515 males) pre-apprentices representing 49% of the total candidates that were eligible for the second selection. However, there was no second selection for Bricklaying, Carpentry and Joinery, Solar Photovoltaic and Woodwork Machining trades because there were no candidates for the trades remaining in the database. This was despite available spaces in the colleges for the trades.

There were also fewer applicants remaining in the database to warrant a 30% additional selection for Edible Horticulture. This resulted in colleges that offer the trade not being allocated 30% extra students for the trade.

Furthermore, some colleges were not allocated additional students in specific trades during second selection on consideration that such institutions did not have capacity to handle extra numbers.

The successful Second Selection Pre-Apprentices are expected to report for training on 6th February, 2023, together with successful candidates that were selected in the initial 2023 recruitment.

1.2 SELECTION CRITERIA

The selection was done based on the criteria presented below:

- a) Possession of a Malawi School Certificate of Education or its equivalent;
- b) Passes in science subjects at MSCE;
- c) Applicant's Malawi School Certificate of Education subject scores to break ties;
- d) Affirmative action for applicants with disabilities;
- e) Gender proportion of 50:50 for all male dominated trades;
- f) Gender proportion of 40:60 males to females for the female dominated trades;
- g) Allocation to colleges based on the choice of the applicant where possible;
and,
- h) A Merit-based selection System of recruitment was used.

2.0 STATISTICAL DATA FOR THE 2023 SELECTION

2.1 2023 APPLICATIONS AND SELECTION STATISTICS

Table 1 below shows the number of 2023 Pre-Apprentices that applied and were selected on first and second selection.

Table 1: 2023 applications and selection statistics

	Selected	Not Selected	Total Applications
First Selection	2,575	1,836	4,411
Second Selection	903	933	1,836

As shown in the table above, 2,575 Pre-apprentices were selected on first selection out of the total 4,411 representing 58% and 903 Pre-Apprentices were selected on second selection out of the total 1,836 representing 49%.

2.2 GENDER DISTRIBUTION OF FIRST AND SECOND SELECTION PRE-APPRENTICES

Table 2: Gender Distribution of First and Second Selection Pre- Apprentices

	Male	Female	Total
First Selection	1,459	1,116	2,575
Second Selection	515	388	903

Table 2 shows the gender distribution of apprentices who were selected on first and second selection.

Figure 1 shows the gender distribution of the pre-apprentices who were selected on first and second selection. It demonstrates that on first selection, 57% of the total selected were males and 43% were females. Likewise, on the second selection, 57% were males and 43% were females.

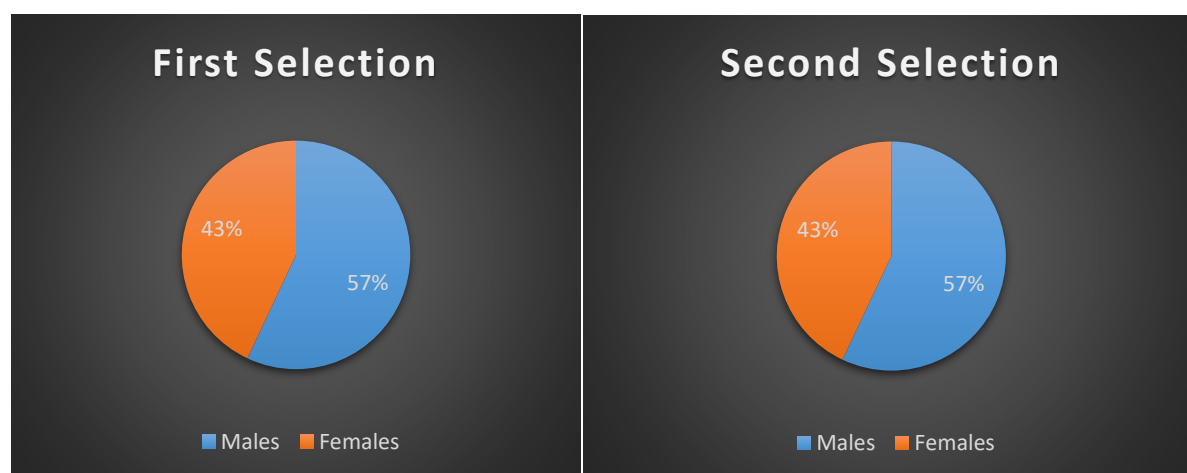

Figure 1 Gender Distribution of first selection and second selection

3.0 COLLEGE SPACES

Tables 3 and 4 below show the college spaces per occupation that were considered during the second selection. **Table 3** shows spaces for colleges that were not given students in the initial selection because of regulatory shortfalls and **Table 4** are the 30% spaces that were added to each occupation. Table 3 shows that AAS registered the highest number of spaces, 65, that were not filled during initial selection followed by ICT which registered 60 spaces. Correspondingly, Figure 4 shows that during second selection highest numbers of spaces were created in ICT at 160 and AAS at 158.

4.0 SECOND SELECTION STATISTICS BY REGION

The majority of successful second selection pre-apprentices were from the Southern Region as shown in the table and figure below:

Table 5: *Second Selection by Region of Origin*

Region	Second Selection			
	Female	Male	Total	Percentage
Central	116	200	316	35%
Northern	86	92	178	20%
Southern	186	223	409	45%
Grand Total	388	515	903	100%

Figure 2 below shows second selection results per region. The chart shows that 45% of the total selected were from the Southern Region, while 35% were from the Central Region and 20% were from the Northern Region.

As shown in the table, Lilongwe registered the highest numbers in the second selection 9% followed by Ntcheu and Mzimba. On the other hand, Mchinji, Likoma and Mwanza had the lowest numbers of selection at 1% each.

Figure 3 below shows the Second selection by district of origin.

4.2 SELECTION BY OCCUPATION

The table below shows the number of successful second selection pre-apprentices by occupation:

Table 7: Second Selection by Occupation

Figure 4 shows the number of selected applicants per occupation. AAS registered the highest number of selection figures followed by ICT and EIE. The lowest selection registered was for EHC, MCM, RAC and TRG. These trades have the lowest selection because there are few colleges that offer training in these trades.

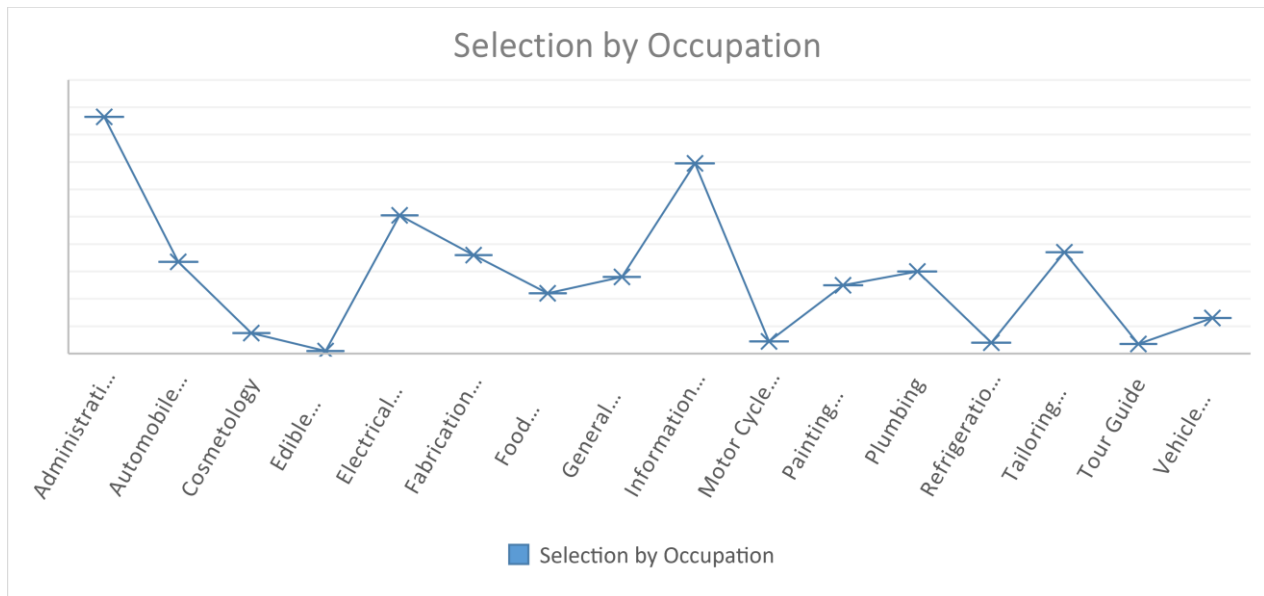

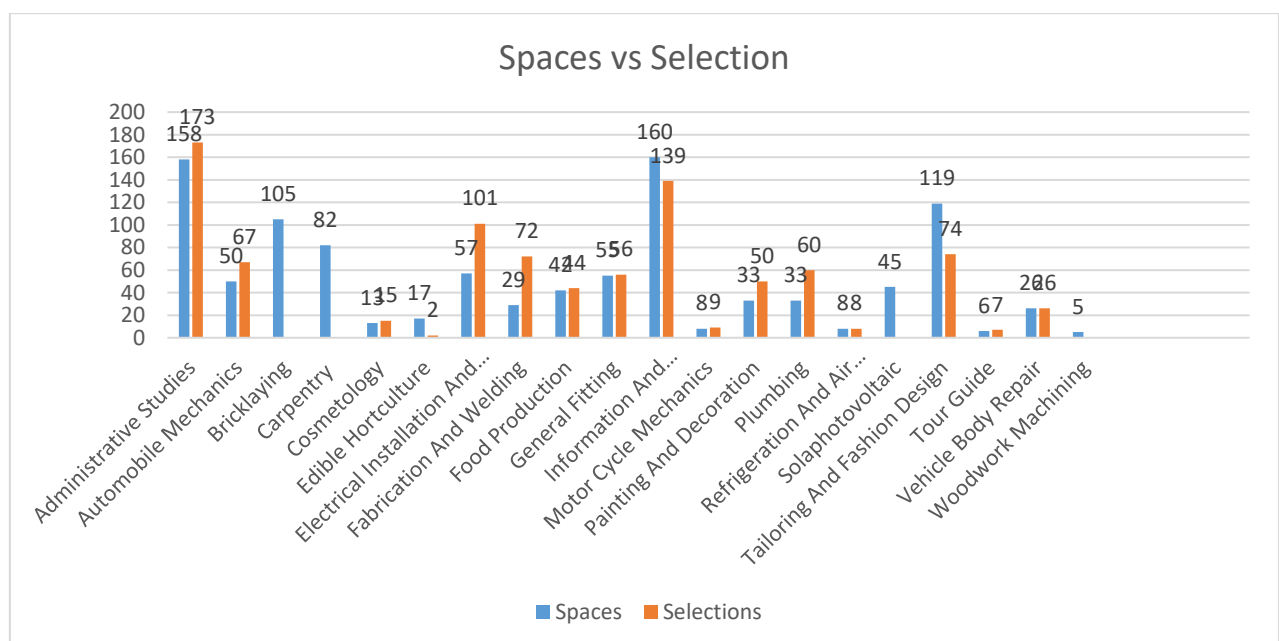

Figure 4 Selection by occupation

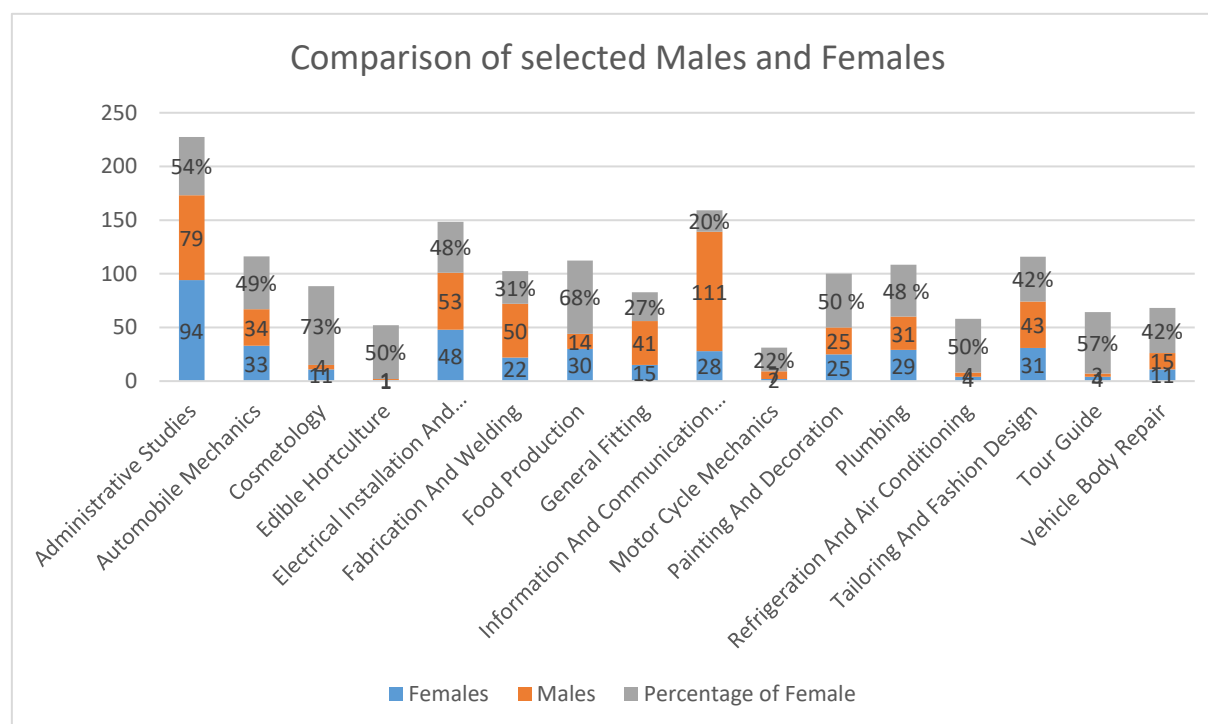

4.3 SPACES VS SELECTION

Figure 5 below shows the number of spaces that were added to each occupation vs the actual selection. It should be noted that despite having spaces in WWM, BRL and CRJ, SPV and CMG there were no applicants in the database for the trades. 173 students were selected in AAS against the 158 spaces that were there and 101 students were selected in EIE against the 57 spaces. There were less applicants for TFD, 74, against 119 spaces and 139 applicants for ICT against 160 spaces.

4.4 PERCENTAGE OF FEMALES PER OCCUPATION

Figure 6 below shows the number of females and males selected to each occupation. It also shows the percentage of females per occupation. For instance, CMG had the highest number of females selected (73%) followed by FPR (30). On the other hand, GFT, ICT and MCM had the lowest number of females (27%), (20%) and (22%) respectively.

4.5 COLLEGE ALLOCATION
